The numbers that are stated beside the arrows and lines are multiplicities: they show how many objects participate in the relationship.

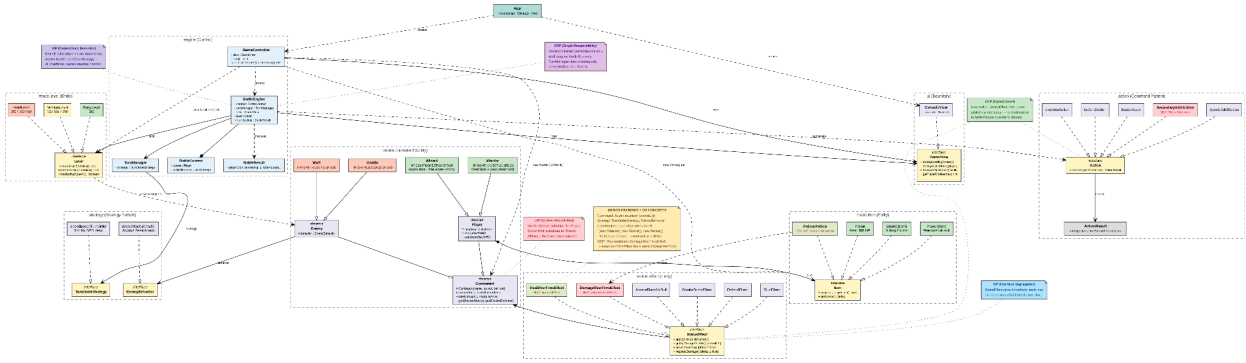
1 — exactly one

0..2 — zero to two (Player carries 0 to 2 Items)

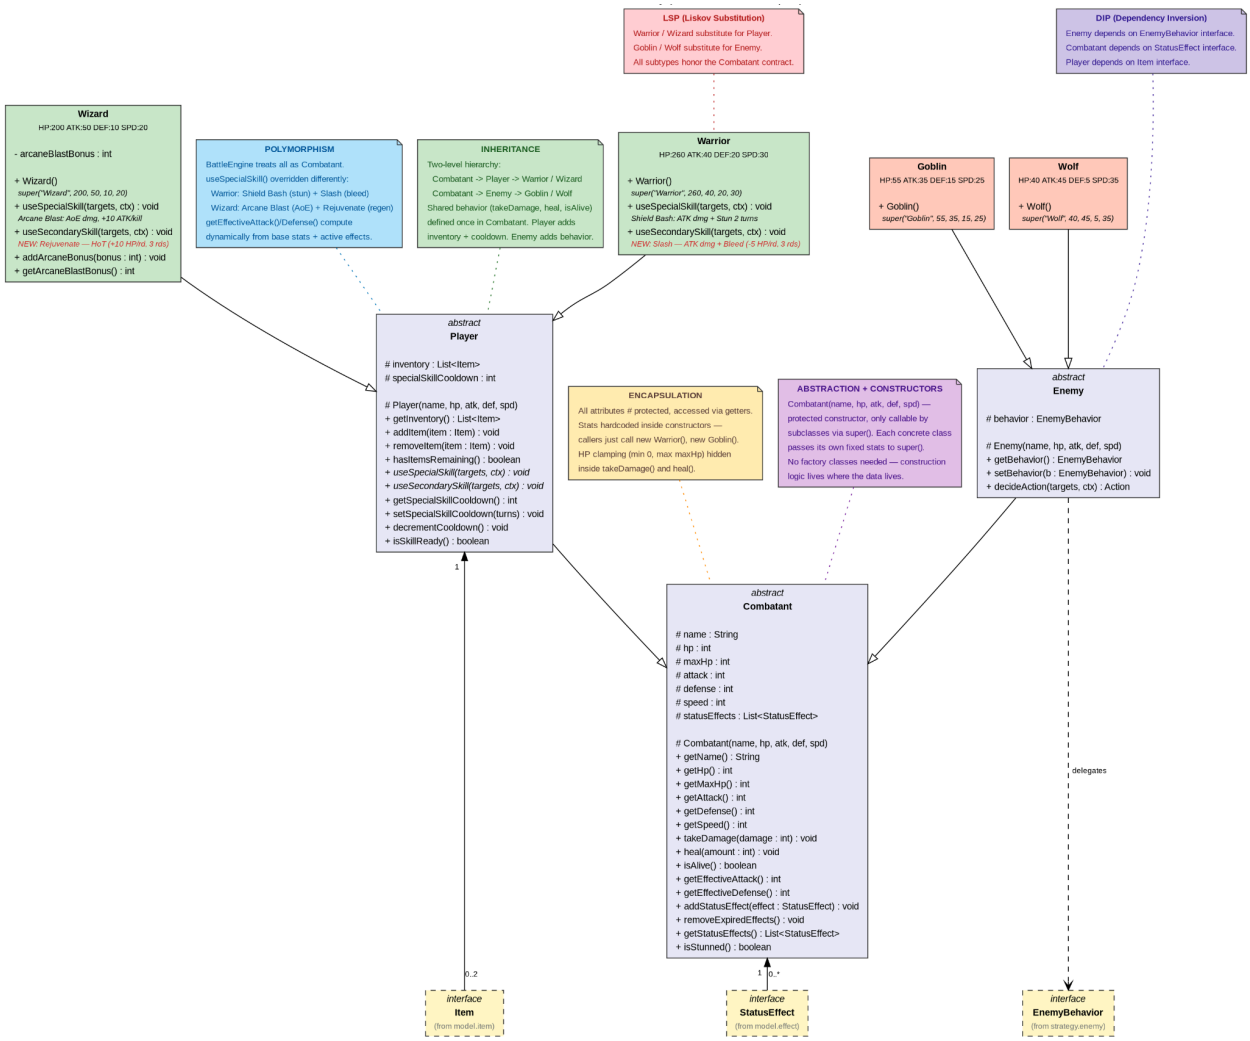
0..* — zero to many (Combatant has 0 to many StatusEffects)

So for example, the arrow from Player to Item labeled 0..2 means each Player holds between 0 and 2 items in their inventory

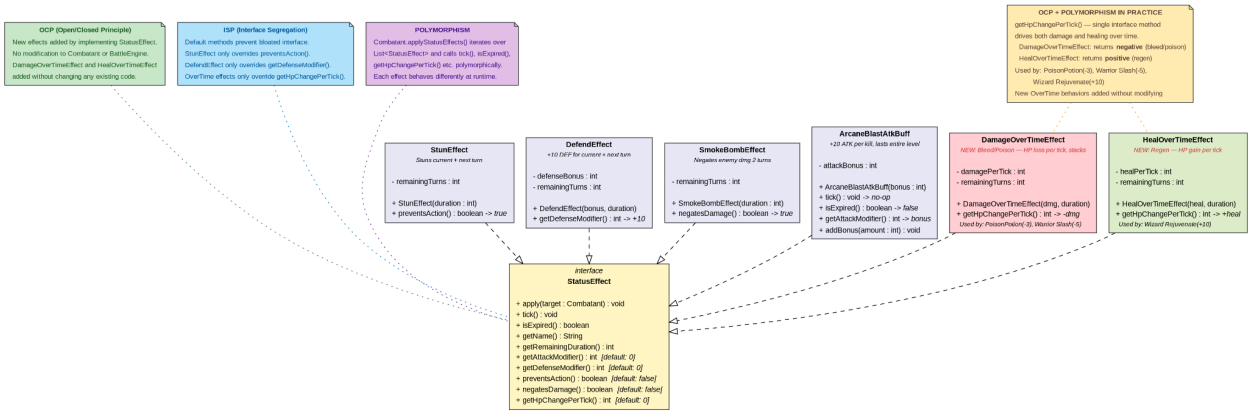
00_master — Full system overview with all packages and cross-package relationships



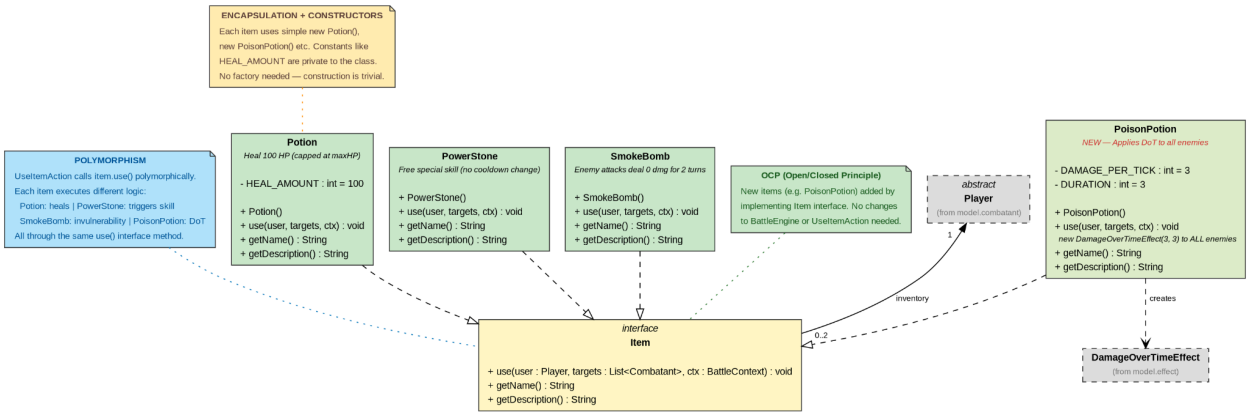
01_combatant — `Combatant` → `Player`/`Enemy` hierarchy with Warrior, Wizard, Goblin, Wolf



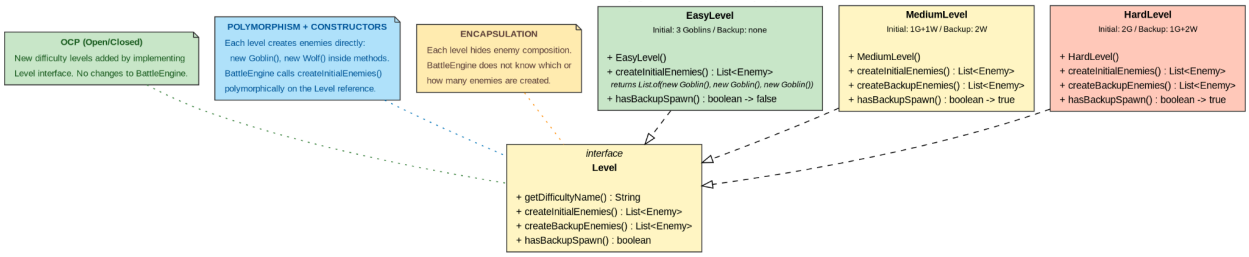
02_effect — `StatusEffect` interface with StunEffect, DefendEffect, SmokeBombEffect, ArcaneBlastAtkBuff with 2 new effects DOT and HOTs



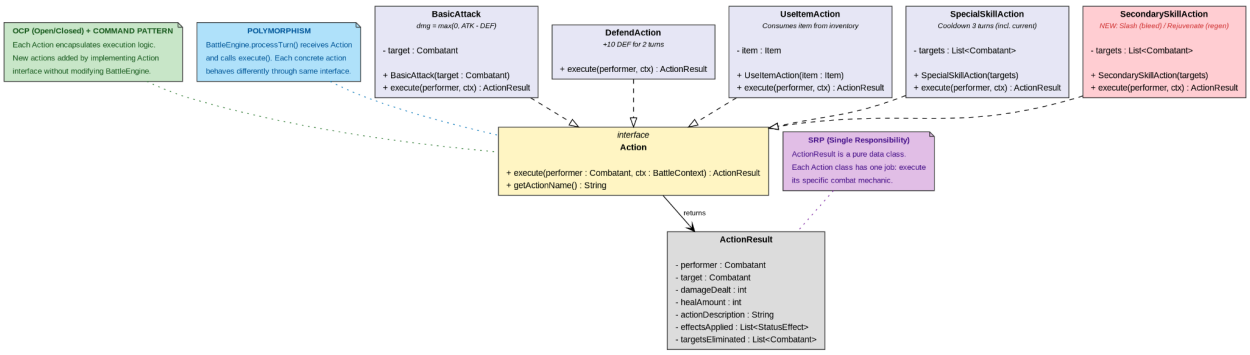
03_item — `Item` interface with Potion, PowerStone, SmokeBomb with new Poison Potion



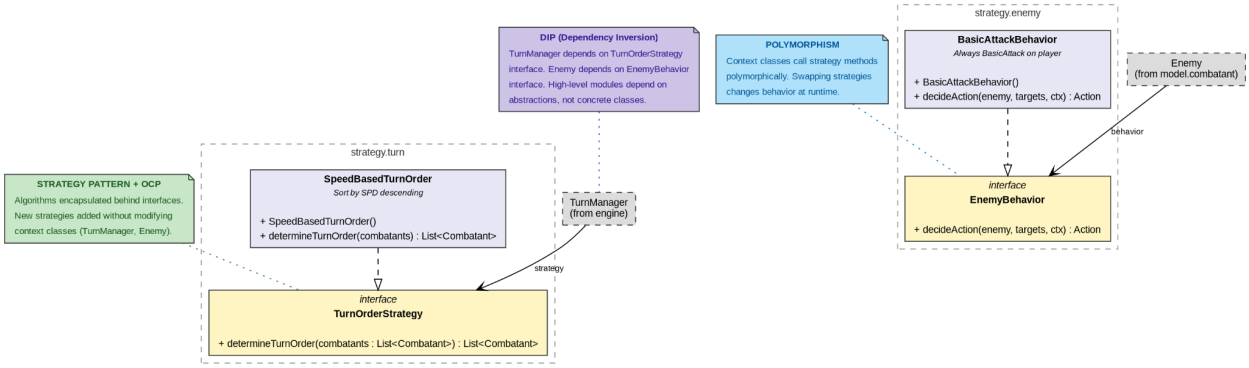
04_level — `Level` interface with EasyLevel, MediumLevel, HardLevel



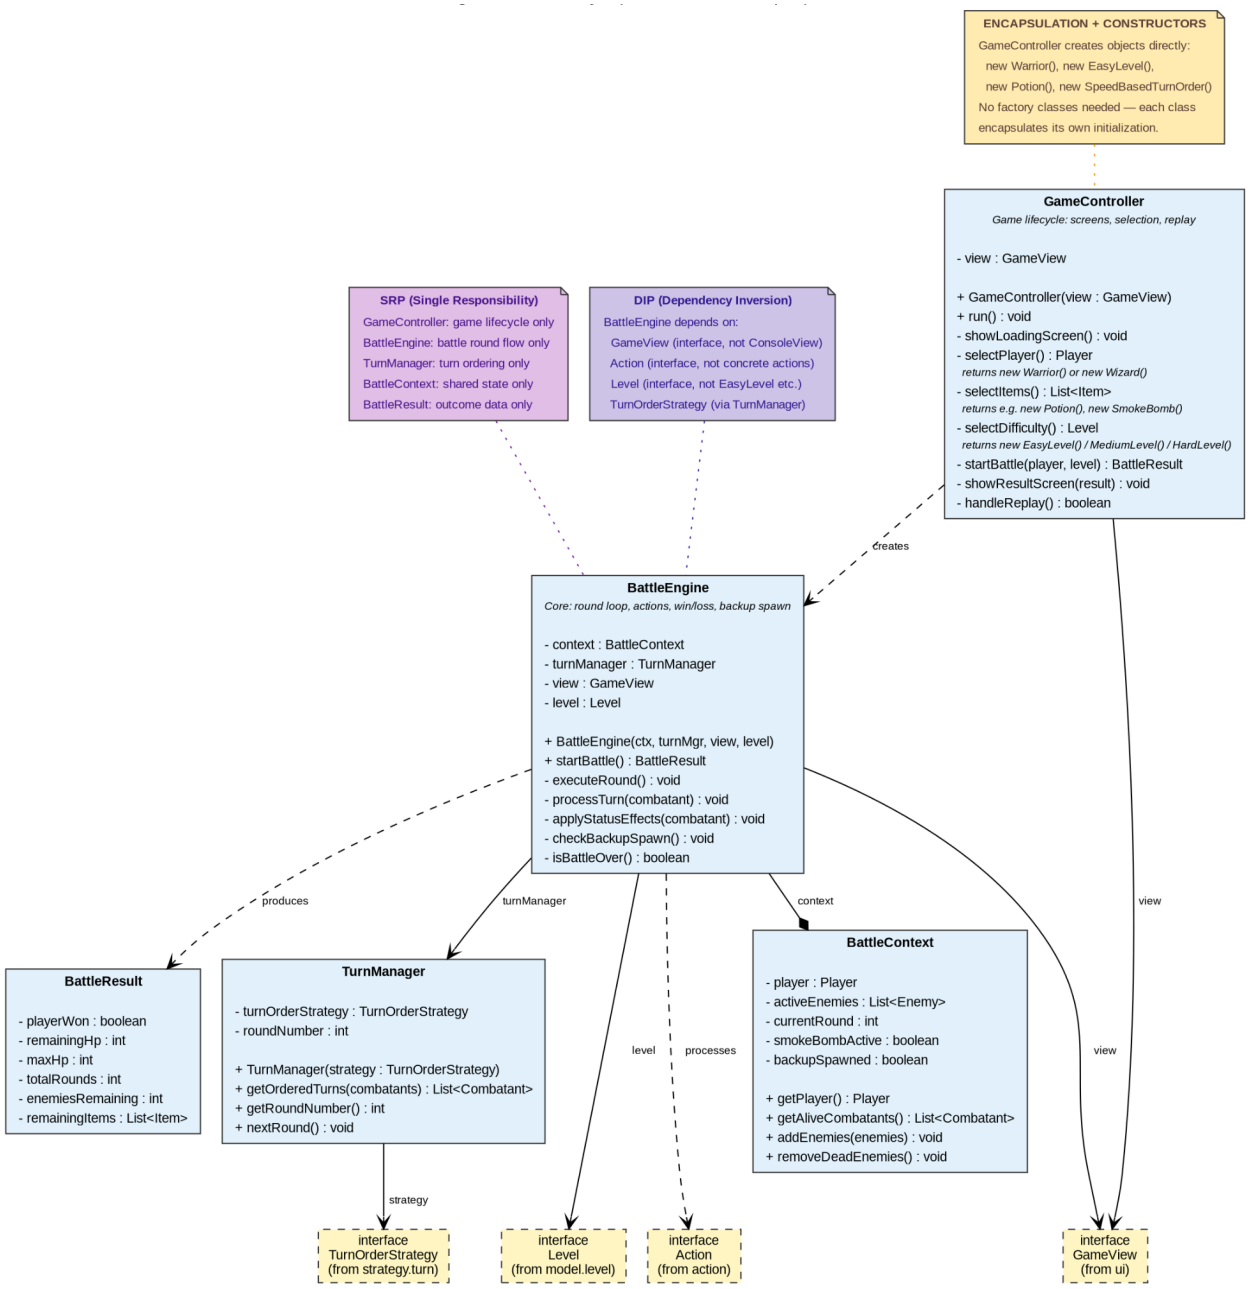
05_action — `Action` interface (Command pattern) with BasicAttack, DefendAction, UseItemAction, SpecialSkillAction + ActionResult



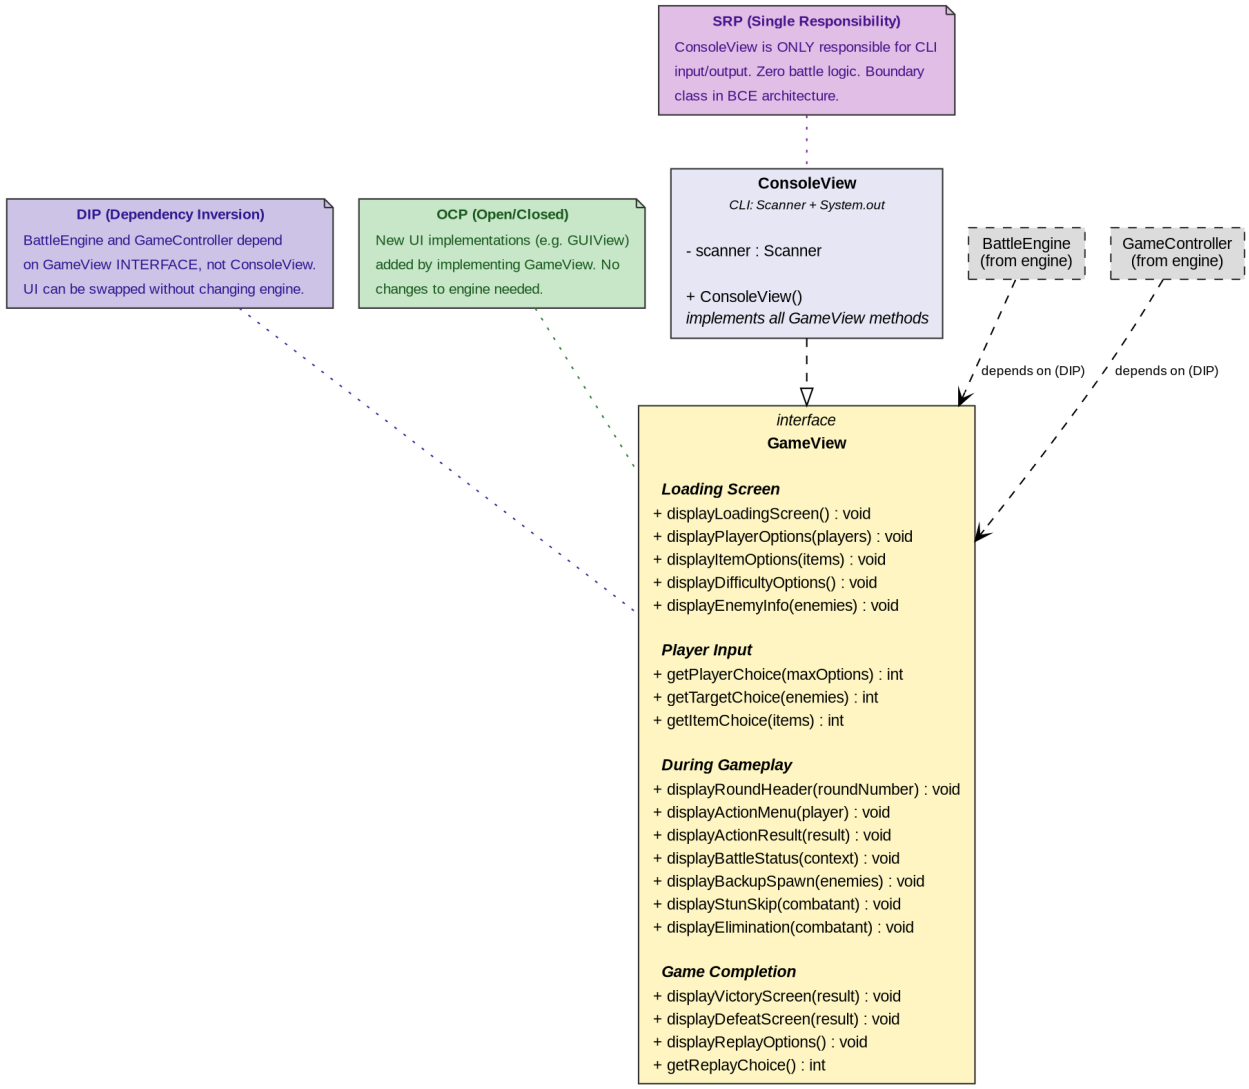
06_strategy — TurnOrderStrategy + EnemyBehavior (Strategy pattern)



07_engine — Control layer: GameController, BattleEngine, TurnManager, BattleContext, BattleResult



08_ui — GameView interface + ConsoleView (Boundary layer, DIP)



Exclusive potions to be used once

Thief (new entity)
Basic damage: 45
Basic Health: 220
Damage over time: Poison Potion (item) which will deal over 3 rounds (-3 per round will stack) to all enemies in combat and this will be a 1 time usage

Warrior (burst kill potion)
After deploying he will lose 20xp and cannot use the potion if he he is low on health (<20)
Instant 1 shot kill for any entity
He cannot move for the next round

Wizard (blind potion)
All entities cannot move for one round (stunned)

Overall: Increase max health of enemies

<u>Make use of DOT system</u>

Potion: Poison potion

<u>Special Skill</u>
Warrior slash - bleed 5hp per round on top of basic attack

Wizard - heal 15 hp per round

Random Nerfs: (every 4 rounds)
- all enemy health +10 (15%)
- next attack from goblins (enemy) stun entities for 1 round (15%)
- wolf bleeding effect for 3 rounds (-5hp to entity every round) (15%)
- Player lose 10 defense for 1 round (15%)
- nothing happened (40%)

Random number
1-15 first
16-30 second
31-45 third
46-60 fourth
61-100 do nothing

Class:
Add new effect called damageOverTimeEffect
Add 3 more items (poison common and can be used by any and the 2 exclusive potions unique to the wizard and the warrior)
